Activities: Schools for the Knowledge Economy Project, Jordan School Expansion Project, Learning Environment: Improved Infrastructure Program, Enhancing School Management and Planning

USAID Investment: \$330 million

Contact: Andrew Parks, aparks@usaid.gov, Issam Omar, iomar@usaid.gov

Investing in school infrastructure through renovation, expansion, and construction

- Addressing the education needs of the large influx of young Syrian refugees
- Reducing overcrowded classrooms and schools, particularly in urban areas
- Updating facilities with new teaching materials and equipment
- Presenting opportunities for out-of-school and at-risk youth

Targeting the government policy and institutional capacity to do operations and maintenance

- Providing professional development for educators to improve teacher and student performance
- Improving psychosocial school environments to reduce drop-out rates

Enhancing school quality and learning features for all students and teachers

- Providing life skills activities
- Fostering a safe and more suitable school environment
