

BUILDING LOW EMISSION ALTERNATIVES TO DEVELOP ECONOMIC RESILIENCE AND SUSTAINABILITY (B-LEADERS) PHILIPPINES

Supporting the Philippine government's efforts to rehabilitate the power facilities for internally displaced people in the war-stricken Marawi City

Implementing Partners: RTI International

USAID Investment: \$1.597 million

Contact: Lily Gutierrez, lgutierrez@usaid.gov

Developing renewable energy resources and increasing the resiliency of the electrical grid

- Constructing solar street lights and solar panels in rural health clinics
- Supplying lighting for women and girls to safely use common toilets at night

Using a Government-to-Government mechanism to support activities

- Training in solar photovoltaic (PV) installation and troubleshooting
- Fostering a strong relationship between the Philippine Department of Energy and the Lanao del Sur Electric Cooperative
