

Venezuela Regional Crisis – Complex Emergency

JANUARY 11, 2022

SITUATION AT A GLANCE

- The UN released the 2022 RMRP in mid-December, requesting nearly \$1.8 billion in humanitarian funding for the response to the Venezuela regional crisis.
- More than 6 million Venezuelan migrants and refugees have fled Venezuela, making it the second largest displacement crisis globally after Syria, R4V reports.
- An estimated 7 million people inside Venezuela will require humanitarian assistance in the coming year, according to the 2022 GHO.
- With USAID/BHA and other donor funding, WFP reached nearly 450,000 Venezuelans and host country nationals in Colombia, Ecuador, and Peru in October.

KEY DEVELOPMENTS

2022 RMRP Requests Nearly \$1.8 Billion to Support 3 Million Venezuelans

The Regional Interagency Coordination Platform for Refugees from Venezuela (R4V)—led by the International Organization of Migration (IOM) and the UN High Commissioner for Refugees (UNHCR)—launched the 2022 Regional Response Management Plan (RMRP) on December 9, 2021, requesting nearly \$1.8 billion to address the humanitarian needs of 3 million Venezuelan migrants, refugees, asylum-seekers, as well as approximately 800,000 host country nationals across 17 countries in Latin America and the Caribbean (LAC). Of the more than 6 million Venezuelans displaced by the crisis, 5 million reside throughout 17 LAC countries, where they continue to confront a range of critical unmet needs exacerbated by barriers to socioeconomic integration in host countries, according to R4V.

Colombia, Ecuador, and Peru, which collectively host more than 3.6 million Venezuelan migrants and refugees, are slated to receive nearly 80 percent of appeal funding. In 2022, R4V projects that recent migration trends will continue and likely increase due to a sustained surge in irregular flows amid coronavirus disease (COVID-19)-related border closures and movement restrictions, as well as a rise in the secondary migration of Venezuelans northward to countries such as Mexico and the United States. R4V further anticipates that moderate outmigration from Venezuela will persist amid gradually easing border restrictions throughout LAC, while complex humanitarian protection hazards—including human trafficking, sexual violence, and increasing rates of gender-based violence (GBV)—will persist or worsen among Venezuelans who lack formal legal status. Overall, priority needs outlined in the appeal include food, health, protection, shelter, and water, sanitation and hygiene (WASH) assistance, as well as interventions to mitigate the spread of COVID-19. In addition, the 2022 RMRP highlights the need to prioritize assistance to regional governments seeking to regularize Venezuelan migration, improve migrants' ability to access government services, and otherwise facilitate socioeconomic integration.

7 Million People in Venezuela to Require Humanitarian Assistance in 2022

Seven million people in Venezuela will require humanitarian assistance in 2022 following eight consecutive years of political and economic crisis, according to the 2022 UN Global Humanitarian Overview (GHO). While macroeconomic conditions in Venezuela are projected to improve in 2022 compared to 2021, a combination of hyperinflation; political polarization and mismanagement; localized violence; and international sanctions are likely to continue to adversely affect economic conditions and humanitarian needs in the country, the GHO notes. Additional needs drivers include poor service provision in education, public health, and WASH as well as the strain of COVID-19 on an already fragile health care system. Approximately 77 percent of Venezuelans experienced extreme poverty during 2021, a nearly 15 percent increase from levels observed in 2020, indicating deteriorating humanitarian conditions, according to the ENCOVI study published by the Andrés Bello Catholic University in September 2021. Upward pressure on food prices due to the informal dollarization of the Venezuelan economy may further restrict household purchasing power during 2022, especially among those lacking access to foreign currency, according to the GHO. Overall, priority humanitarian needs in Venezuela during 2022 include reducing food insecurity and malnutrition rates, enhancing humanitarian protection assistance, and providing life-saving support. Expanding humanitarian access, especially for non-governmental organizations (NGOs), will also remain a top priority for relief actors, the GHO reports.

Access Conditions Deteriorated in Colombia and Venezuela in 2021

Humanitarian access deteriorated in Colombia and Venezuela during the second half of 2021, according to a December report from the Assessment Capacities Project (ACAPS). In Venezuela, humanitarian access constraints increased during the July-to-December period, primarily due to new regulations and

restrictions on humanitarian operations and the Maduro regime's continued refusal to assess the true level and scope of humanitarian needs, obstructing humanitarian planning. Meanwhile, recurring clashes between rival armed groups along the Colombia–Venezuela border posed additional impediments. In Colombia, access constraints escalated, mainly due to rising violence among rival armed groups competing for territorial control in border areas along the country's Pacific coast. From January to November 2021, armed violence displaced more than 72,000 Colombians, representing a nearly 200 percent increase compared to the same period in 2020, the UN reports. The U.S. Department of State's Bureau of Population, Refugees, and Migration (State/PRM) is working closely with the International Committee of the Red Cross (ICRC) and UNHCR to address unmet needs among these displaced households, as well as among Colombian refugees in Venezuela. In both countries, relief actors continue to advocate for increased humanitarian access in order to expand the number of beneficiaries. In November 2021, the UN World Food Program (WFP), with USAID/BHA and other donor funding, reached approximately 457,000 people in Colombia with cash-based support, in-kind food assistance, capacity-building activities, and/or socioeconomic integration support. Separately, in Venezuela, WFP continues to expand a school-based food assistance pilot launched in July in the country's Falcón State, aiming to reach more than 1 million food insecure people—mostly children—with rations by the end of the 2022–2023 school year.

2 Million Migrants in Colombia, Ecuador, Peru Face Food Insecurity

An estimated 2 million of the more than 3 million Venezuelans living in Colombia, Ecuador, and Peru were experiencing food insecurity as of August 2021, a figure broadly consistent with levels observed in recent years, WFP reports. With limited income-generating opportunities compared to resident populations, approximately one-quarter of Venezuelans surveyed in August reported consuming one meal or less the previous day, while more than two-thirds reported utilizing negative coping strategies such as selling assets or borrowing money to meet basic food needs. Colombia hosts the largest share of Venezuelans experiencing difficulties in food consumption during the assessment period—72 percent of the total Venezuelan migrant population—followed by Ecuador and Peru at 68 percent and 61 percent, respectively. In response, WFP continues to provide emergency food assistance to vulnerable Venezuelan households in the region. With USAID/BHA and other donor funding, the UN agency reached nearly 450,000 Venezuelan migrants and refugees in the three countries with in-kind and cash-based food assistance during the month of October.

Livelihoods Disparity Affects Venezuelans in Brazil's Roraima State

Venezuelan migrants and refugees residing in shelters in northern Brazil's Roraima State earn significantly less than native Brazilians and Venezuelans who have settled elsewhere in Brazil, the UN reports. Venezuelans sheltering in Roraima—which hosts the majority of the estimated 287,000 Venezuelan migrants and refugees in Brazil—earn approximately \$107 per month, roughly one-third of the statewide average income, according to a survey published by State/PRM partners UNHCR and UN Women in January. While respondents cited the Portuguese language barrier as a primary impediment to more lucrative income-generating opportunities, the UNHCR–UN Women survey, conducted between March 2020 and April 2021, found that Brazil's military-led, UN-supported Operation Welcome relief and resettlement initiative—partially funded by State/PRM contributions to implementing NGO partners—had helped Venezuelans significantly boost incomes. Among the more than 60,000 Venezuelans resettled under the program to date, average earnings totaled approximately \$240 per month—more than double the level among Venezuelans in shelters and slightly greater than Brazil's minimum wage; however, the income level remains approximately one-half the average monthly earnings among native Brazilians countrywide, according to the report.

U.S. GOVERNMENT RESPONSE

FOOD SECURITY

USAID/BHA assistance aims to address acute food insecurity among migrants, refugees, and host community members residing in Brazil, Colombia, Ecuador, and Peru, as well as vulnerable Venezuelans inside Venezuela. USAID/BHA-funded emergency food assistance—implemented through NGOs such as the Adventist Development and Relief Agency (ADRA) in Brazil and Solidarités International in Colombia, as well as WFP in Colombia, Ecuador, and Peru—includes locally procured in-kind food assistance, hot meals, cash transfers for food, food vouchers, and complementary nutrition and WASH support. In Venezuela, USAID/BHA is funding NGO and UN partners to provide hot meals and in-kind food assistance. In total, these programs targeted nearly 630,000 people in Brazil, Colombia, Ecuador, and Peru and more than 90,000 people in Venezuela with USAID/BHA FY 2021 support. USAID/BHA also contributes to coordination and capacity-building activities for food security actors that aim to improve the quality of humanitarian programming for the Venezuela regional crisis.

HEALTH

USAID/BHA provided more than \$28 million to NGO and UN partners in Colombia and Venezuela to provide life-saving health care services to vulnerable Venezuelans and host community members in FY 2021. USAID/BHA-supported projects continue to help partners distribute medical supplies, support service provision at health facilities, and train community health workers to address urgent health needs. With FY 2021 funding, USAID/BHA partners provided 674,000 people across the two countries with improved access to health care services, with interventions ongoing. Additionally, State/PRM partners—including International Federation of Red Cross and Red Crescent Societies (IFRC), UNHCR, and Jesuit Refugee Service (JRS)—continue to support essential health interventions for Venezuelans residing in 17 LAC countries, including Brazil, Colombia, Ecuador, and Peru.

WASH

USAID/BHA and State/PRM continue to support WASH programming to address the needs of vulnerable Venezuelans and to prevent the spread of COVID-19 and other communicable diseases. State/PRM partners implement WASH activities that assist Venezuelans residing outside Venezuela, including WASH measures to mitigate the risk of COVID-19 infection. With FY 2021 funding, State/PRM supported the UN Children's Fund (UNICEF) to reach nearly 960,000 beneficiaries across Brazil, Colombia, and Ecuador. In addition, USAID/BHA provided nearly \$32 million in FY 2021 funding to several relief agencies to implement critical

WASH activities inside Venezuela, which include providing personal protective equipment and training local health care workers to respond to cases of COVID-19 in Venezuela, conducting hygiene awareness sessions, rehabilitating WASH infrastructure in schools, and installing handwashing stations at community kitchens.

FY 2021 MPCA
funding in Colombia

ECONOMIC RECOVERY AND CASH ASSISTANCE

With more than \$58 million in FY 2021 funding for multipurpose cash assistance (MPCA), USAID/BHA partners are distributing cash assistance to vulnerable households in Colombia through prepaid debit cards and cash transfers. MPCA transfers enable recipients to prioritize needs such as food, health care, essential household items, school supplies, and shelter, as well as provide a means to pursue income-generating opportunities.

State/PRM partners in Brazil, Colombia, Ecuador, and Peru support economic recovery by strengthening livelihood opportunities and socioeconomic integration among vulnerable Venezuelans, providing training and resources to enable the adoption of sustainable entrepreneurship and employment strategies. State/PRM partners provide Venezuelans with registration and technical assistance for work permits; employment and vocational training; language training; technical skills certifications; business development training; and the provision of seed capital and cash assistance via bank transfers, prepaid cards, and mobile money platforms.

2021 funding

PROTECTION

State/PRM and USAID/BHA support 31 partners to address protection concerns among nearly 1.3 million vulnerable Venezuelans residing in Venezuela and across the region, particularly along the Venezuela–Colombia border and in the Caribbean where the protection space is especially limited. State/PRM-supported protection activities aim to increase access to and support the provision of protection services, including GBV prevention and case management, child-friendly spaces, community-based mental health and psychosocial support, and legal assistance. State/PRM partners also work with the broader humanitarian community across the region to support advocacy efforts with local and national authorities and promote the delivery of protection services in areas with significant humanitarian access constraints.

CONTEXT IN BRIEF

- Deteriorating economic and political conditions—characterized by hyperinflation—in the Bolivarian Republic of Venezuela have decreased households’ access to food, medicine, and livelihoods; contributed to increasing humanitarian needs; and triggered an influx of Venezuelans into countries across LAC, primarily to Brazil, Chile, Colombia, Ecuador, and Peru. By November 2021, more than 6 million Venezuelans were living outside of Venezuela, according to R4V, led by IOM and UNHCR.
- The population influx continues to strain available services, especially in border areas of Brazil, Colombia, Ecuador, and Peru. Recent assessments indicate that food, health care, and WASH support are among the most urgent humanitarian needs among vulnerable populations, including Venezuelans, Colombian returnees from Venezuela, and host communities in border regions. The outflow of people from Venezuela also contributes to increased public health concerns throughout the region, particularly with regard to overburdened health care systems and the spread of COVID-19, as well as other infectious diseases.
- On April 16, 2018, USAID activated the Venezuela Regional Crisis Response Management Team (RMT) in Washington, D.C., to coordinate USG regional humanitarian efforts. On June 7, 2018, USAID activated the Venezuela Regional Crisis Disaster Assistance Response Team (DART) to support delivery of life-saving assistance across the region.
- In addition to supporting ongoing regional response activities, USAID/BHA and State/PRM staff members based throughout the region and in Washington, D.C., are monitoring the humanitarian situation in close coordination with relevant host governments, donor governments, NGOs, and UN counterparts.

¹Year of funding indicates the date of commitment or obligation, not appropriation, of funds. Funding figures reflect publicly announced funding as of January 11, 2022.

PUBLIC DONATION INFORMATION

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations. A list of humanitarian organizations that are accepting cash donations for disaster responses around the world can be found at [interaction.org](https://www.interaction.org).
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, and warehouse space); can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietarily, and environmentally appropriate assistance.
- More information can be found at:
 - USAID Center for International Disaster Information: [cidi.org](https://www.cidi.org)
 - Information on relief activities of the humanitarian community can be found at [reliefweb.int](https://www.reliefweb.int).

USAID/BHA bulletins appear on the USAID website at [usaid.gov/humanitarian-assistance/where-we-work](https://www.usaid.gov/humanitarian-assistance/where-we-work)
