**PROCUREMENT INSTRUMENT IDENTIFIER (PIIDs) FOR COOPERATING  
COUNTRY NATIONAL AND THIRD-COUNTRY NATIONAL (TCN) PERSONAL  
SERVICES CONTRACTS (PSCs)**

Non-GLAAS PIIDs follow the same numbering system used in GLAAS, with the added requirement that the CO must identify the CCNPSC with a “1”, and the TCNPSC with a “2,” in the first digit of the sequential number.

In accordance with **ADS 309.3.1**, the CO must use the PIID protocol as shown in the top line of the examples in the table below (e.g. 72030618R10007). The description in the second line of each example in the table below is provided to explain what each alpha-numeric character represents. Do not use special characters, such as hyphens, dashes or spaces.
