

USAID
FROM THE AMERICAN PEOPLE

USAID E-HEALTH ACTIVITY

The government of the Republic of Serbia has launched an ambitious digitization effort to ensure that the country takes full advantage of all of the opportunities digitization can bring in all sectors. As part of these efforts, modernizing the country's Health Information Systems (HIS) will help provide healthcare institutions with faster access to more accurate information.

The USAID E-Health activity is supporting the Office of the Prime Minister, Ministry of Health, Institute of Public Health, and the Office of eGovernment and IT in the development and operationalization of an eHealth Strategy for the health sector.

ACTIVITIES IN SERBIA

- Strengthening the governance and enabling environment for eHealth (for example, providing technical expertise to develop and support the implementation of the eHealth Strategy).
- Improving data analysis and use (for example, through assessments and training on data use for action and developing a platform to support advanced data analytics for health).
- Our work will complement the efforts of the eHealth Steering Committee to improve systems interoperability in the health sector and scale up existing systems.

ADDITIONAL INFORMATION

PROJECT FUNDING

U.S. Agency for International
Development (USAID/Serbia)

TOTAL FUNDING

\$1,000,000
