

## SENE YIRIWA (DELTA ZONE)

### Description

Feed the Future (FTF) Mali Sene Yiriwa (prosperous agriculture) is a five-year activity working with farmers to increase and diversify production of crops and livestock, and sustainably improve on-farm resilience to climate, economic, and conflict-related shocks and stresses. Sene Yiriwa advances Mali's FTF Country Plan focusing on select agricultural value chains in 80 communes that are in Mali's FTF Zone of Influence and Resilience Focus Zone. DevWorks International leads the activity consortium which includes Catholic Relief Services (CRS), Sahel Eco, Tassaght, Texas A&M University, and others.

Sene Yiriwa is complemented by a market systems activity (Sugu Yiriwa) working in the same communes to collectively develop the supply and demand side of agricultural production. Sene and Sugu Yiriwa place special emphasis on the shock-prone socio-political and environmental context of Mali's Delta Zone. These two activities, along with Albarka, USAID's Resilience Food Security Activity in Mali, lie at the heart of USAID's community resilience efforts.

### Goal

To catalyze integrated, inclusive, and diverse on-farm production systems leading to increased sales, availability, and access to nutritious foods for farming households.

### Objectives

To advance the three core FTF goals:

- Promote inclusive and sustainable agricultural led growth.
- Increase resilience of people and communities.
- Improve nutrition, especially among women, adolescent girls, and children.

### Specific Objectives

- Improve delivery of quality products and services.
- Increase productivity through climate-smart agriculture.
- Increase incomes without reducing household's ability to farm.
- Provide access to climate meteorological data.
- Improve land and water resource management.
- Increase the availability of nutrient-dense foods.

Producer Organization (PO) registry session in Mopti region

**BUDGET:** \$24,145,648

**PROJECT CYCLE:** 2021 – 2026

**TARGET AREAS:** 80 communes from 12 circles in the Delta Zone: Bandiagara, Bankass, Dire, Djénné, Douentza, Goundam, Koro, Mopti, Niafunké, Ténénkou, Tombouctou, and Youwarou.

#### PROJECT BENEFICIARIES:

Producer organizations, smallholder farmers (agriculturalists and pastoralists) with an emphasis on women and youth.

#### IMPLEMENTING PARTNER:

DevWorks International

#### SELECTED RESULTS:

Results	Overall Targets	2022	
		Target	Actual
- Individuals participating in USG food security programs	46,000	14,000	12,000
- Individuals applying improved technologies and/or management practices	32,000	3,300	3,600
- Hectares under improved technology and/or management practices	54,000	4,000	4,300
- Host Government community risk management plans formally proposed, adopted, and implemented in target communities	100	5	6
- Value of new private sector investment leveraged by USG to support food security and nutrition (\$)	630,000	2,500	8,676
