FY 2023 REPORT TO CONGRESS

U.S. GOVERNMENT STRATEGY ON INTERNATIONAL BASIC EDUCATION

The U.S. Agency for International Development (USAID) submits this report on behalf of Departments and Agencies as a progress update in response to the requirement in Section 4(a) of the Reinforcing Education Accountability in Development (READ) Act of 2017. This report describes the implementation of the U.S. Government Strategy on International Basic Education during fiscal year (FY) 2023.

**MESSAGE FROM THE ACTING SENIOR COORDINATOR
FOR INTERNATIONAL BASIC EDUCATION ASSISTANCE**

Dear Colleagues,

This report highlights results from the U.S. government’s international basic education programs for fiscal year 2023. In addition, it is the final report for the 2018–2023 Strategy on International Basic Education. Two years into implementation of this Strategy, the COVID-19 pandemic caused the largest disruption to education and learning in modern history, exacerbating the pre-pandemic learning crises. Education systems faced extraordinary headwinds as countries worked to address learning loss with limited resources and continued disruptions from conflict, crises, and natural disasters.

Despite challenges from the COVID-19 pandemic and ongoing conflicts and crises disrupting education, U.S. government programs increased the number of learners who attain minimum proficiency in reading in 15 countries during and after the pandemic emergency. Programs implemented over the course of the 2019–2023 U.S. Government Strategy on International Basic Education reached more than 34 million learners annually. In total over the five years, U.S. government programs trained 2.9 million teachers and educators, supplied 176 million textbooks and other teaching and learning materials, and worked to strengthen systems, including by adopting 525 new or reformed laws and policies. In addition, the U.S. government provided an average of 3.4 million children and youth with school meal services annually, recognizing that children must be healthy when they enter school, so they are ready to learn.

Through the [U.S. Government Strategy on International Basic Education 2024–2029](#), the U.S. government will continue building on these efforts and partner with countries and stakeholders to increase capacity and strengthen education systems to be more inclusive and responsive to the needs of all learners and educators, particularly girls and other historically marginalized groups. This includes strengthening cross-sectoral coordination to reduce barriers to education and increase learning outcomes. Each agency and department involved in international basic education brings distinct resources, expertise, capabilities, and experience to address global challenges. The collective results of the U.S. government’s efforts will further learning for students and improve their quality of life more broadly by supporting economic growth, improving health outcomes, reducing violence, and increasing participation in democratic governance.

—LeAnna Marr, Acting U.S. Senior Coordinator for International Basic-Education Assistance

THE USG STRATEGY OBJECTIVES

Released in 2018, the U.S. Government Strategy on International Basic Education for Fiscal Years 2019–2023 has two main objectives: (1) improve learning outcomes; and (2) expand access to quality basic education for all, particularly marginalized and vulnerable populations.

The U.S. government (USG) remains committed to these goals and in FY 2023, basic education programs reached **44 million learners in pre-primary, primary, secondary, vocational, and workforce development programs**. USG programs will continue to build on this success and strengthen education systems in partner countries to provide access to safe, high-quality learning.

Learners in pre-primary, primary, secondary, vocational, and workforce development programs					
Year	2019	2020	2021	2022	2023
Total	35,618,803	25,421,782	33,478,011	32,770,583	44,920,387

Objective One: Improve Measurable Learning Outcomes

Under the Strategy, the USG prioritizes learning, which is essential for individuals to gain the skills necessary to be productive members of society and the workforce.

Provide children with a strong foundation

The USG supports the physical, cognitive, linguistic, and social-emotional development of children and youth through: (1) child nutrition and health programs and (2) pre-primary education programs.

Number of children and youth who received health and nutrition services					
Year	2019	2020	2021	2022	2023
Total	3,164,276	2,979,426	4,093,861	3,574,986	3,569,078

In FY 2023, the USG provided **3.5 million children with nutrition** assistance through McGovern-Dole projects that fed nutritious school meals to school-age children in 34 countries. For example:

- In **Bangladesh**, the McGovern-Dole project is demonstrating a positive and lasting impact in promoting reading habits and improving reading skills for primary students through a partnership with the World Food Programme (WFP). The project has benefited more than 49,000 preschool and primary school students from 170 schools in the Cox's Bazar District. Through the donation of U.S. commodities and funds to locally procure commodities, the McGovern-Dole project provides fortified, high-energy biscuits to students daily and implements several activities to improve literacy, health,

and nutrition outcomes for students, including teacher training and coaching, establishment of classroom libraries, distribution of learning materials and storybooks, parent sensitization meetings, organization of educational events, and capacity-building for national and local education officials. As a result, a recent study found that students from McGovern-Dole schools performed significantly better in tasks related to reading and writing proficiency.

Number of pre-primary learners who received education interventions in formal and non-formal settings					
Year	2019	2020	2021	2022	2023
Total	N/A	20,232	520,069	1,197,692	1,913,736

The USG provided education support to **more than 1.9 million children through pre-primary programs** in FY 2023. For example:

- Since 2019, USAID and the LEGO Foundation have collaborated and co-invested resources and expertise to advance pre-primary and primary education, social-emotional learning, and play-based approaches. In **Ethiopia**, USAID and the LEGO Foundation are partnering on the Childhood Development program to support more than 15,000 pre-primary children and communities affected by conflict and drought across five regions. The two organizations planned to invest a total of \$46 million over five years to support quality, inclusive pre-primary classrooms and temporary learning spaces, train teachers and facilitators to provide psychosocial first aid and foster play-based pedagogies, and strengthen community engagement.

Improve basic skills

The USG works with stakeholders in partner countries to increase students’ reading, math, and other basic skills in primary school and secondary school.

Number of primary and secondary learners who received education interventions in formal and non-formal settings					
Year	2019	2020	2021	2022	2023
Total	34,726,518	24,387,064	32,208,199	30,735,733	41,413,610

In FY 2023, the U.S. government reached **41 million primary and secondary-aged students with opportunities to learn literacy, numeracy, and other basic skills** in formal and non-formal settings, including in local languages. For example:

- The USAID Mission in **Rwanda’s** investments in early grade reading have surpassed expectations, resulting in significant improvements in literacy for third graders nationwide. In 2023, the percentage of third graders who passed a national benchmark

for oral reading fluency increased to 87 percent, up from 54 percent in 2021. Additionally, 83 percent achieved the benchmark in reading comprehension, up from 68 percent in 2021. This builds on Rwanda’s reading gains achieved between 2018 and 2022, when most of the world experienced learning losses due to COVID-19. One of the identified reasons for this improvement was USAID’s support for textbook distribution programs, which increased students’ access to reading materials. The approach was bolstered by home visits from community health workers, who encouraged families to tune in to radio lessons and read their school books.

Number of teachers/educators who received training/professional development					
Year	2019	2020	2021	2022	2023
Total	561,353	314,490	449,390	821,985	966,700

In FY 2023, the U.S. government trained and provided professional development to over 966,000 teachers and educators, improving their instruction in literacy, numeracy, and other basic skills. For example:

- In **Georgia**, the USAID Basic Education Program provided training in student-centered instruction, remediation, formative assessment, and inclusive education for trainers from eight universities, and the participants then trained 7,118 lead teachers across the country. The activity also conducted a workshop on instructional leadership for more than 90 percent of school principals, piloted learning management system software to deliver professional development courses for teachers that registered more than 10,000 users, and collaborated with the Ministry of Education and Science to host a learning recovery conference, which developed recommendations to help students recover from learning loss following the COVID-19 pandemic emergency.

Number of textbooks and other teaching and learning provided					
Year	2019	2020	2021	2022	2023
Total	49,279,463	32,344,691	51,628,035	12,847,167	30,626,699

In FY 2023, the USG distributed more than **30 million textbooks and other teaching and learning materials**. For example:

- In the **Philippines**, the USAID Gabay program tripled enrollment in its project sites of children who are deaf, blind, or deafblind. Teachers at inclusive education centers **developed and delivered more than 5,000 accessible learning materials** in braille and Filipino Sign Language, using equipment provided by USAID. The activity developed a Filipino Sign Language dictionary, available in both print and electronic formats, for use by teachers, parents, and students. As a result of the program, Filipino Sign Language training for teachers is now mandated nationwide and funded by the national Department of Education.

Number of parent-teacher associations (PTAs) or community-based school governance structures engaged in primary or secondary education supported with USG assistance					
Year	2019	2020	2021	2022	2023
Total	24,891	22,098	30,652	28,856	11,483 ¹

In FY 2023, the U.S. government engaged with more than **11,400 parent-teacher associations (PTAs) or community-based school-governance structures**. For example:

- In **Mongolia**, the Peace Corps is working to strengthen formal classroom instruction in English starting in grade 5. To help parents better understand the experience of learning a new language, teachers at a school in Darkhan hosted a Parents’ Night. Participating parents were immersed in the four English language arts—speaking, listening, reading, and writing—and left the evening having learned new language skills. As a result of this outreach effort, parents became more connected to their children and the school, and gained a greater appreciation of the value of foundational English learning, as reported in qualitative narratives.

Prepare individuals for a productive future

The USG works with governments and the private sector in partner countries to improve retention rates in primary and secondary schools, remove barriers to education of secondary school-age youth, and improve formal and non-formal educational opportunities.

Number of tertiary and technical and vocational education and training learners who received education interventions in formal and non-formal settings					
Year	2019	2020	2021	2022	2023
Total	892,285	1,014,486	749,743	837,158	1,593,041

In FY 2023, the USG provided **1.5 million individuals with tertiary, vocational, and other workforce training**. For example:

- In September 2023, the Millennium Challenge Corporation (MCC) signed a Threshold Agreement with the Government of **Kiribati** that includes a \$16.6 million education and skills activity benefiting youth ages 15 to 17 with improved work-readiness skills. This activity will fund youth skills camps and academic year scholarships for Kiribati high school students to provide them with English language immersion and information and communications technology (ICT) skills. The activity aims to have a diverse group of students including those from the outer islands and from underprivileged or marginalized groups.

¹ As part of a systematic review of indicators, USAID removed this indicator in FY 2023 in an effort to reduce burdens on Missions, resulting in a reduction in overall reporting.

- In **Guatemala**, USAID worked closely with the Ministry of Education to reach children and youth from Indigenous and underserved communities through the Gen Now: Youth Impact Leaders activity, which trained 60 youth participants in soft skills, social and emotional learning (SEL) skills, and the teaching at the right level (TaRL) methodology. The youth then volunteered as math and reading tutors in 34 schools, tutoring 1,755 third graders to improve their academic performance. Of those tutored, 94 percent attained minimum proficiency in reading, up from 77 percent at baseline.

Objective Two: Expand Access to High-Quality Basic Education for All, Particularly Marginalized and Vulnerable Populations

Under the Strategy, the USG prioritizes reaching the most marginalized and vulnerable groups to support learning in safe, equitable, and high-quality educational environments.

Expand access to high-quality basic education for children and youth affected by crisis and conflict, especially those who are displaced

The U.S. government funds education programs in crisis- and conflict-affected environments¹ to respond to short-term educational needs. These programs also work with stakeholders in partner countries to address the long-term, systemic reforms needed to mitigate future crises and build individual, community, and institutional resilience. As part of these efforts, the USG partners with international organizations and nongovernmental organizations to expand access to education for refugees and others affected by conflict.

Number of at-risk individuals who received education interventions in formal and non-formal settings					
Year	2019	2020	2021	2022	2023
Total	50,055	2,262,704	598,843	1,771,383	2,244,588

In FY 2023, data collected by newly established indicators show that education programs **reached 2.2 million children and youth at risk, including those affected by crisis and conflict.** For example:

- Through support from the Department of State, UNICEF’s Dirasa program in **Lebanon** works to support and reintegrate out-of-school Lebanese and non-Lebanese children, including children with disabilities, into formal education systems to encourage retention and avoid dropout. This program provides tailored assistance and resources, such as individualized education plans for children with disabilities, assistive technology, modified assignments, and communication aids to facilitate the return of children to school, helping to enable equitable access to education for all.
- USAID’s Together We Learn Activity (Juntos Aprendemos) in **Colombia** is working to improve the quality of education offered to vulnerable migrant, refugee, and returnee

children, including at the pre-primary level. The activity is supporting communities, schools, and classrooms so they can meet the educational needs of children and adolescents who are affected by migration, including girls, migrants, and Afro-Colombian learners.

- At the 2023 **Global Refugee Forum**, the USG pledged to advocate for the inclusion of refugees in national education systems and for inclusive policies and practices across multilateral partners. These pledges build on and deepen the USG’s inclusive education work and demonstrate leadership on including refugees in national education systems.

Number of educational facilities (school, classrooms, libraries, labs, latrines) built or repaired					
Year	2019	2020	2021	2022	2023
Total	9,512	6,427	8,172	8,427	5,852

In FY 2023, the U.S. government **built or repaired 5,852 educational facilities in 36 countries** that provide safe, accessible, and supportive learning environments for students and teachers. For example:

- In **Cote d’Ivoire**, MCC is working through the Skills for Employability and Productivity Project to increase the number of years of education that learners receive and improve the acquisition of quality, in-demand basic skills, including reading, math, and soft skills, for lower secondary students. The project also improves the acquisition of quality, in-demand technical skills to increase job placement rates among graduates of Compact-supported technical and vocational education and training centers, and supported the ongoing construction of 30 secondary schools.

Expand access to high-quality primary and secondary education for individuals who experience discrimination and marginalization, including girls

The USG works to provide the most marginalized and vulnerable populations with access to safe, equitable, and high-quality education. This work has far-reaching positive effects on individuals and their households, communities, and countries.

Number of women or girls who received education interventions in formal and non-formal settings					
Year	2019	2020	2021	2022	2023
Total	11,924,366	12,138,920	11,783,505	12,772,205	19,428,935

In FY 2023, the U.S. government **provided education interventions to more than 19.4 million young women and girls** in formal and non-formal settings. **This figure represents approximately 50 percent of the beneficiaries** for whom sex is known, and is reflective of the success of efforts to achieve gender parity in programs. For example:

- The USAID Girls’ Education program in **South Sudan** provided cash transfers to girls to purchase school uniforms, hygiene kits, and other materials to help them remain in school, decreasing the likelihood of child, early, and forced marriages and unions. USAID is part of a coordinated donor effort to provide mentoring to young girls, leveraging various outlets such as teen magazines, school debates, and radio programs to encourage girls to remain in school and raise awareness of the dangers of early marriage.
- In **Somalia**, USAID and the United Kingdom’s Foreign, Commonwealth and Development Office (FCDO) partner on the Adolescent Girls Education (AGES) project to transform the lives of thousands of girls across the country. By integrating formal and alternative education pathways with financial literacy, life skills, mentorship, and girl-led civic action, AGES offered flexible learning options for girls who encounter multiple barriers to effective education. The project improves girls’ access to education and equips them with the tools needed to break the cycles of poverty, gender inequality, and limited economic opportunities.

Number of new or reformed public-sector laws, policies, regulations, and/or administrative procedures that support increased access and/or learning adopted					
Year	2019	2020	2021	2022	2023
Total	57	57	51	157	203

- **Worked with governments and parliaments in 32 countries to adopt 203 new or reformed public-sector laws, policies, regulations, and/or administrative procedures that support increased access to education and/or improved learning.** For example:
 - In FY 2023, MCC, in partnership with the Government of **Morocco**, successfully completed the Secondary Education Activity under the Education and Training for Employability Project. The Secondary Education Activity worked to improve the quality of secondary education by piloting a participatory approach to school improvement in 90 schools across three regions of Morocco. The activity invested in reforms to school governance, coupled with targeted investments in infrastructure, technology, and training for teachers and school administrators. It also invested in improvements to the education management information system and in the operations and maintenance of school infrastructure and equipment.

Expand access to high-quality basic education for children and youth vulnerable to violence, abuse, and exploitation, particularly child laborers, married adolescents, and victims of trafficking

The USG works to address barriers to education faced by the world’s most vulnerable children and youth and to tackle the root causes of child labor, in part by promoting access to high-quality education. Ensuring children and youth who are victims of or vulnerable to exploitation,

abuse, and violence are able to receive an education is essential to breaking cycles of poverty and violence. For example:

- In FY 2023, the Department of Labor's (DOL) **Madagascar Shines** project began working with local stakeholders to establish community-based childcare centers in Madagascar's Anôsy Region. With support from local partners, the project uses these centers to address the urgent need for safe and nurturing childcare services to support parents who work in the mica mining sector. Without childcare services, parents are forced to choose between earning money to support their children and exposing them to the hazardous conditions of a mica mine. Beyond creating a safe environment for children, these centers offer early childhood education and care, promoting children's cognitive and social development, and helping prepare children so that they are able to advance successfully through the education system. Childcare centers launched by the project have enrolled 265 children, and the project is in the process of expanding the centers to reach many more children.
-

ANNEX ONE: CONTRIBUTIONS BY DEPARTMENTS AND AGENCIES IN FY 2023

U.S. Department of Agriculture

The United States Department of Agriculture's (USDA) McGovern-Dole International Food for Education and Child Nutrition Program (McGovern-Dole) supports international basic education by providing school meals to pre-school and primary-school-age children, and funding teacher training, classroom materials, school construction and rehabilitation, capacity-building, and related support to help boost the school enrollment and academic performance of pre-school and primary students. In Fiscal Year (FY) 2023, 56 of USDA's McGovern-Dole school-feeding operations were active in 34 countries and benefited more than 4.5 million children and community members. The McGovern-Dole program allocated \$197 million in FY 2023 to achieve these efforts.

Throughout FY 2023, the McGovern-Dole program contributed to the U.S. Government Strategy on International Basic Education (the Strategy) through alignment, coordination, and co-locating, primarily with the U.S. Agency for International Development (USAID), education programs with an effort to improve measurable learning outcomes and expand access to education. In an effort to avoid duplicating literacy efforts in geographic areas where USAID's education and USDA's McGovern-Dole programs align, USDA encouraged its McGovern-Dole implementing partners to use teacher-training materials and children's learning materials developed by USAID, rather than unnecessarily creating duplicative materials. For example, in Guatemala the USAID education program and McGovern-Dole used the same approach to implementing literacy activities in all primary schools country-wide, including identical textbooks, supplemental reading materials, and teacher-training materials. During FY 2023, the McGovern-Dole program actively coordinated with USAID in approximately eight countries through discussion, the sharing of information, coordination, and collaboration. USDA encouraged the implementers of projects to operate in the same schools as USAID's Early Grade Reading Programs, and, in some cases, expanded educational activities to older grades to avoid the duplication of efforts.

The McGovern-Dole program greatly contributes to the education sector of the many countries it serves. From curriculum development to distribution of school supplies and materials, bilingual education, pedagogical development, and national policy development, the McGovern-Dole program is making long-lasting impacts in the education sector around the world.

To select priority countries, USDA utilizes the following process:

- Step 1: Application of Universal Indices List (low to lower-middle income economy; literacy rates; nutritional status; host government commitment; effective governance)
- Step 2: Eliminate/ Retain Continuing Countries /Additions from Post Continuing countries strategy (McGovern-Dole evidence-based; ability to graduate); Foreign Agriculture Service (FAS) Post requested
- Step 3: FAS Post and other USG Consultations: FAS Post Calls – include other FAS

Program Areas (Global Programs, Foreign Affairs, Global Market Analysis, and Trade Policy and Geographic Affairs) and other USG agencies (USAID, State Department, and the Food and Nutrition Service)

- Step 4: Information Gathering: Information-gathering through scoping missions, monitoring trips, the Global Child Nutrition Foundation school meals survey, and the School Meals Coalition
- Step 5: Special Request Considerations: FAS senior leadership and other USG overlapping priority considerations

U.S. Department of Education

The Department of Education (ED) continued its international engagement with other countries by participating in multilateral organizations, such as Asia-Pacific Economic Cooperation (APEC), the Organization of American States (OAS), and the Organization for Economic Cooperation and Development (OECD) and multilateral forums, such as the G7 and G20. ED also hosted visitors, virtually and in person, who wish to learn about U.S. education and share information about their countries through exchanges, such as the International Visitor Leadership Program (IVLP) and addressed education-related issues with individual countries on a bilateral basis.

ED was the lead agency for both the G7 and G20 Education Working Group and Education Ministerial meetings. The purpose of the meetings was to engage in a dialogue with counterparts from other G7 and G20 countries regarding the themes of the Education Ministerial meetings. Officials participating in the 2023 G20 Ministerial meeting discussed, *inter alia*, their governments' perspectives on policies related to ensuring foundational literacy and numeracy, especially in context of blended learning; making tech-enabled learning more inclusive, qualitative, and collaborative at every level; building capacities, promoting life-long learning in the context of the future of work; and strengthening research, and promoting innovation through richer collaboration in education training. At the 2023 G7 Education Ministerial meeting, the topics for discussion during the meetings included the role of schools in society after the COVID-19 pandemic; education that unlocks the potential of all children; fostering learners to adapt to social changes and global challenges; and re-connecting the world: the role of international education exchange.

The International Summit on the Teaching Profession (ISTP) brings together education ministers and union leaders annually to discuss how to improve education in their countries and make actionable commitments to change. In 2023, the overall theme of the ISTP was *Poised for the Future: Transformative Teaching for Global Engagement, Sustainability, and Digital Access*. Delegations explored the sub-themes of (1) Elevating and enhancing the teaching profession; (2) Educating for global and cultural competence and civic engagement; and (3) Leveraging digital technologies to ensure equitable access and enhanced learning for all. The United States hosted ISTP 2023 in Washington, D.C.

At the end of ISTP 2023, the U.S. delegation committed to the following:

- Purposeful collaboration across educational levels and agencies to ensure student well-being and academic success.
- Promote schools as inclusive community centers enabling students, families, and educators to thrive through collaboration.

- Strengthen support for educators as valued professionals, emphasizing collaboration, recruitment, working conditions, and diversification. Innovate teacher preparation and leadership and promote strategies to grow and retain our educator workforce.
- Collaborate to modernize education so all students have access to high-quality career pathways, and the system prepares all students, teachers, and families to employ ever-changing digital technology that furthers learning in appropriate and responsible ways.

ED led two education events during the U.S.-hosted Asia Pacific Economic Cooperation (APEC) meetings held in Detroit, Michigan in May 2023. The two-day APEC Education Officials Dialogue allowed economies to share best practices related to community-schools strategies. The Dialogue reinforced that inclusive and holistic reforms help foster the sustainable development of Asia-Pacific education systems. ED also chaired the annual Education Network meeting, where economies shared priorities related to digital literacy promotion, strengthening the teaching profession, and data-informed policymaking.

ED has also continued to engage on education issues with countries of the Western Hemisphere through the Organization of American States. In follow-up to the 11th Inter-American Meeting of Ministers of Education held in November 2022, ED has participated in ongoing dialogue with the OAS and fellow member states regarding shared priorities, including achievement of the Sustainable Development Goals (SDGs); post-pandemic academic recovery; supporting students' and teachers' socio-emotional health; digital skills and education technology; and increased coordination between the education sector and the health and labor sectors.

U.S. Department of Labor

In FY 2023, the Department of Labor (DOL) awarded over \$45 million in new grants and cost increases to combat child labor, forced labor, and human trafficking around the world. DOL's Bureau of International Labor Affairs' (ILAB) projects adopt a holistic approach to promote sustainable efforts that address underlying causes of child labor, including poverty and lack of access to education. Project strategies include linking vulnerable groups to existing government social programs, providing children with education or training opportunities, helping families improve their livelihoods to meet basic needs without relying on child labor, and raising awareness about risks of child labor and trafficking.

Since 1995, DOL has funded more than 360 projects to combat child labor and forced labor internationally, with activities in 99 countries. These projects have supported more than 65 governments in adopting laws and regulations on child and forced labor, consistent with international labor standards; provided educational services and vocational training to millions of children; provided assistance to vulnerable families; provided training to labor inspection and law enforcement officials; and trained teachers on child labor issues and approaches for helping increase access to education in disadvantaged communities. DOL-funded projects have also supported publication of a wide range of material that contributes to the global knowledge base on child labor, forced labor, and human trafficking, including conducting over 90 national child labor surveys around the world that are integral for targeted and effective labor policies, and by conducting rigorous impact evaluations of technical assistance projects to assess intervention quality and generate actionable knowledge of successful practices for our partners to investigate, adopt, replicate, and scale.

DOL prioritizes countries for programming based on criteria that include the following considerations: documented need for programming to address child labor, particularly its worst forms, including forced child labor and human trafficking; demonstrated commitment of governmental, non-governmental, and private sector partners to promoting positive change; the potential for long-term impact; and Administration priorities.

U.S Department of State/ Bureau of Population, Refugees, and Migration (PRM)

In FY 2023, the Bureau of Population, Refugees, and Migration (PRM) provided a total of nearly \$98 million to support education programs for refugee, stateless, and conflict-affected children. In a world where conflict and displacement present significant barriers and challenges for children, education is a key component to PRM's mission in providing protection and improving access to solutions for refugees, stateless, and conflict-affected children. Education provides displaced children and adolescents with a sense of normalcy and stability while helping them develop essential skills for self-reliance, improving their job prospects, and boosting their sense of dignity. PRM contributes to the U.S. International Basic Education Strategy through humanitarian assistance and diplomacy. In FY 2023, PRM continued to support humanitarian partners, such as the UN Refugee Agency (UNHCR) and the UN Children's Agency (UNICEF), as well as NGOs to provide quality and protective education for marginalized children by investing in teachers, ensuring schools are inclusive and safe, conducting outreach to increase access for girls, and providing alternative programs such as accelerated learning, catch up or bridge support, and vocational training. PRM also provided \$7 million to Education Cannot Wait to ensure refugee children continue to benefit from first response and multiyear resilience programs to increase access to and improve quality of education.

Additionally, PRM continued to work with the USG interagency and other partners to advocate globally and at the country level for refugee children in national education systems. At the Global Refugee Forum in 2023, the USG made three pledges committing to refugee-inclusive education in U.S.-funded education programs globally, in the next U.S. Government Strategy on Interagency Basic Education, as well as in multilateral engagement including the Global Partnership for Education and Education Cannot Wait.

Millennium Challenge Corporation

The Millennium Challenge Corporation Millennium Challenge Corporation (MCC) recognizes that strengthening human capital is critical to achieving poverty reduction and economic growth. Investing in education and skills development can help countries compete in the global economy. There is a strong correlation between expenditures on education and the rate of economic growth and a direct correlation between household income and education attainment. The importance MCC puts on investments in education is reflected in our selection criteria. For a country to be eligible for MCC assistance, it must demonstrate a commitment to just and democratic governance, investments in people and economic freedoms. MCC's [selection criteria](#) include an updated indicator that measures a country's investments in education. This indicator measures girls' completion of lower secondary education and government expenditures for all levels of education, including higher levels of education.

As of September 2023, MCC has invested \$817.6 million in education in 12 countries. These investments include general education, vocation education and training/workforce development, higher education, and adult literacy. These investments have resulted in:

- 906 education facilities constructed or rehabilitated
- 13,402 instructors trained
- 483,291 students participating in MCC-supported education activities
- 80,341 graduates from MCC-supported education activities

Peace Corps

For more than 60 years, Peace Corps Volunteers have integrated into communities to support the development needs of countries around the world. With 58 countries hosting Trainees and Volunteers, the focus of Peace Corps' work is tailored to fit the host country's national priorities and to operate by way of collaboration and support from both national and regional partners. This participatory relationship focuses on skills transfer, cultural understanding, improved livelihoods, collaboration with host country governments, and using local needs assessments to determine community development priorities.

Education continues to be the Peace Corps' largest sector in which Volunteers serve, with projects focusing on TEFL (Teaching English as a Foreign Language), Literacy, and Math and Science. The Peace Corps' strategy for education exemplifies the agency's unique approach to development —working across cultures in underserved communities and partnering with people to develop the capacity to improve their own lives in a sustainable manner. In FY 2023, cohorts of Volunteers who returned to service after the pandemic continued advancing education initiatives and goals. It was during this time that Peace Corps Volunteers and staff started responding to the learning loss which occurred as a result of the pandemic. Through the service of Peace Corps Volunteers in FY 2023, over 96,000 students were taught literacy skills, math and/or science using a STEM approach or English in a classroom setting, and over 1,300 teachers were trained in general teaching skills.

In addition to the efforts of Peace Corps Volunteers and staff, many posts also continued to engage returned Peace Corps Volunteers (RPCVs) in support of education programming through the Virtual Service Pilot (VSP). In FY 2023, participation in VSP was opened up to include the general public. Through this initiative, VSP Participants donated their time and voluntary services as private citizens to the agency and engaged overseas counterparts virtually to respond to the requests of interested host country partners for short-term support. Through the VSP initiative, 23 Peace Corps countries supported host country partners with virtual education engagements focused on online and blended learning which resulted in virtual language clubs and teacher training, capacity-building, and curriculum development at the secondary and post-secondary Levels. The strong partnership between the Peace Corps and host countries prioritizes the needs of local communities while leveraging Volunteers' skills to achieve sustainable goals.

Contributions to the Strategy

All Peace Corps Education Projects have three main objectives: (1) building counterpart

teaching capacity, (2) increasing student achievement, and (3) community engagement.

1. **Building Teacher Capacity:** Building counterpart teacher capacity is the ultimate goal of all Education Volunteers. Regardless of the Volunteer's contribution to learner success, if the skills of counterpart teachers are not improved, the effect of the Volunteer contribution will less likely be sustained after their departure. Volunteers focus on developing counterpart capacity-building through teacher communities of practice (COPs), where all members are peers and can contribute to skill-building and understanding according to their abilities and interests, which deepens teacher expertise for all. Evidence indicates that, when possible, co-teaching and co-planning are the optimal mechanisms for capacity-building. In fact, co-teaching and co-planning are the ideal Volunteer-counterpart dynamic. This collaboration allows Volunteers and counterparts to work together to build teaching skills, create lesson plans, strengthen curricula, and create additional classroom resources.

2. **Increasing Student Achievement:** In the classroom with other teachers, Volunteers may work in groups or one-on-one with students who need additional time and attention so that they, too, can succeed in school. Volunteers also provide after-school study groups, clubs, and camps which can reinforce classroom learning in ways that are more contextualized, community-centered, and engaging for learners. Volunteers also improve classroom assessment by modeling and discussing techniques for formative assessment and test design.

3. **Community Engagement in School Improvement and Student Learning:** Sustaining educational gains made in the classroom requires support for education in the community and at home. Education projects that work at the community level encourage community involvement and support for both student learning and school improvement activities. Examples of successful activities include working with parents to help them understand the benefit of their involvement in classrooms, parent-teacher meetings, and in extracurricular activities.

Impact and Results

Each objective includes a series of project activities, outputs, outcomes, and corresponding indicators that Peace Corps posts use to develop a Logical Project Framework (LPF) (including a Logic Model and Monitoring and Evaluation Plan) based on a reference LPF developed at Peace Corps headquarters. Posts train Volunteers to carry out the activities and measure their progress and results. Data collection tools and indicator reference sheets are provided to assist Volunteers with accurately capturing the progress of their work. The data are collected using reporting tools that allow Peace Corps Volunteers, post staff, and headquarters staff to assess, measure, and respond to trends as necessary to improve programming.

U.S. Agency for International Development

Improving education is a foundational driver of development and fundamental to fostering local ownership and sustainability. USAID directly fulfills the objectives of the Strategy through its work under the 2018 USAID Education Policy. In FY 2023, USAID provided technical leadership and support primarily through USAID Missions to ensure that children and youth, particularly the most marginalized, have increased access to high-quality education, and higher

education institutions have the capacity to be central actors in development.

In FY 2023, USAID supported a spectrum of education programs and partnerships in 55 countries. The programs from pre-primary through tertiary:

- Reached 40.1 million learners in pre-primary through tertiary education, including vocational, and workforce training;
- Trained more than 762,000 educators and school administrators with professional development activities;
- Improved the safety of 97,100 learning environments;
- Provided 28 million teaching and learning materials; and,
- Provided over 776 Higher Education Institutions with capacity development support.

Global Commitments and Engagement:

- *Increasing quality education for girls and young women:* As part of USAID's Implementation Plan for the U.S. government's first-ever National Strategy on Gender Equity and Equality, by 2025, USAID established a goal of reaching 15 million girls and young women globally with education assistance from pre-primary through higher education. **USAID exceeded the commitment two years early – reaching over 18 million girls and women** with education assistance in the FY23 reporting period.
- *Inclusive Education:* At the 2022 Global Disability Summit (GDS), USAID announced four [new commitments for disability inclusive education](#), cementing its role as a leader on this issue and joining global partners to advocate for access to quality education for every learner. Since then, USAID has hired additional dedicated inclusive education advisors, and designed and launched internal and external resources to help USAID Education staff and partners fulfill this commitment including through new public facing resources. USAID remains committed to:
 - 1) Advancing the knowledge base of what works in disability inclusive education in partnership with organizations of persons with disabilities and strengthen USAID's use of [disability data for education programming](#);
 - 2) Incorporating principles of [Universal Design for Learning \(UDL\)](#) for all learners in all new USAID Education programs;
 - 3) Increasing USAID initiatives for learners with disabilities in pre-primary education, youth workforce development, higher education, and education finance; and
 - 4) Continuing to provide USAID staff and partners with the knowledge, skills, and tools to advance and effectively implement disability inclusive education, as well as UDL, at all levels of the education continuum.

At the country level, USAID Missions are working in partnership with governments and communities to make education systems more inclusive and equitable. For example, The Gateway to Education activity with USAID/Yemen worked with the Ministry of Social

Affairs and the Ministry of Education to conduct service mapping, identifying service providers that specialize in diagnostic testing and assistive device support for children in need of special services. USAID worked with the Ministry of Education, Governorate and District education offices, Community Education Committees, and Parent/Caregiver Councils to build their capacities to support children with disabilities and their families.

- *Global Refugee Forum*: At the 2023 Global Refugee Forum, the USG—through USAID and the Department of State—pledged to advocate for inclusion of refugees in national education systems and to advocate for inclusive policies with our multilateral partners. **The USG has completed the second commitment**, to include addressing the needs of refugees in the U.S. Government Strategy on International Basic Education (2024-2029) and is working to meet the remaining commitments to advocate for, incentivize, and, where host countries have favorable policies for inclusion of refugees in the national system, include refugees in development-funded education programs and to advocate for refugee inclusion in multilateral engagements, including with the Global Partnership for Education and Education Cannot Wait.
 - *Participation in Multilateral Organizations*: Through engagement with multilaterals, USAID leverages U.S. government influence and advances U.S. government priorities.
 - *Global Partnership for Education (GPE)*: GPE is the largest global fund dedicated to transforming education in lower-income countries. To advance GPE’s work and conduct oversight of U.S. Government investments, USAID’s engagement with GPE occurs at multiple levels, including serving on the GPE Board of Directors and Executive Committee. In addition, USAID Mission staff serve as the Coordinating Agency for GPE in five countries, and USAID staff engage in Local Education Groups to develop and oversee GPE Compacts in over forty countries. In FY 2023, USAID contributed \$130 million to GPE.
 - *Education Cannot Wait (ECW)*: ECW seeks to unite global and national organizations to support access to education for children and youth affected by conflict, natural disasters, and disease outbreaks. USAID serves on the High-level Steering Group and the Executive Committee of Education Cannot Wait, and USAID Mission staff also engage in development and humanitarian coordination at the country level. In FY 2023, the U.S. Government, through USAID and the State Department, contributed \$30 million to Education Cannot Wait.
-

ANNEX TWO: DATA ON COMMON OUTPUT INDICATORS

[Output Indicators as Reported by Departments and Agencies Link](#)

The common output indicators in Annex One are intended to coordinate reporting on the USG international basic education assistance objectives that are codified in the [Reinforcing Education Accountability in Development \(READ\) Act](#):

- Expand access equitably to basic education for all children, particularly marginalized children and vulnerable groups; and
- Improve measurably the quality of basic education and learning outcomes.

An interagency USG Technical Working Group developed indicators to capture progress toward these goals. Currently, federal departments and agencies have greater harmony with respect to indicators that reflect outputs, such as actual numbers reached or produced, rather than metrics that illustrate outcomes, which capture the goal of outreach and production. As a result, the common indicators included in reporting at this time are those that mostly reflect outputs. The USG Technical Working Group is focused on improving collaboration across USG departments and agencies to expand usage of outcome indicators and collection of data, including improving reporting of disaggregated data on marginalized groups. These improvements will contribute to more harmonized outcome and output indicators in future reporting.

The USG Technical Working Group developed the common output indicators by consolidating existing indicators from federal departments and agencies and selecting indicators that were representative of USG funding for international basic education. The indicators address broad categories of support and reflect priorities articulated in the Strategy, including the following:

- Child, youth, and adult learning and preparedness;
- Training teachers/educators;
- Providing safe and equitable learning environments;
- Engaging families and communities;
- Providing textbooks and teaching and learning materials; and
- Systems strengthening.

All common indicator data rely on data from FY 2023 submitted by USG departments and agencies that fund assistance programs in international basic education, including the U.S. Departments of Agriculture (USDA) and Labor (DOL), the Millennium Challenge Corporation (MCC), the Peace Corps, and the U.S. Agency for International Development (USAID). Although the U.S. Department of State supports basic education in the countries in which it works, it does not track outputs separately for the education sector; the Department of State reports data when available through the data call for the annual Performance Plan and Report (PPR). Several of the common output indicators only reflect the work of one or two Federal Departments or Agencies. This reflects reported data from departments and agencies for particular output indicators.

FY 2023 | SUMMARY BY COMMON INDICATOR

Contributing Agencies:

data as of February 2, 2024

I. Child, Youth, and Adult Learning and Preparedness

1a. Number of individuals (children, youth, and adults) who received education interventions in formal and non-formal settings	Number of males	19,621,121
	Number of females	19,428,935
	Total (male and female)	44,920,387
	Number of individuals at risk	2,244,588
	Number of individuals with disabilities	163,256
1b. Number of children and youth who received health and nutrition services	Number of males	1,005,295
	Number of females	1,054,973
	Total (male and female)	3,569,078
	Number of individuals at risk	-
	Number of individuals with disabilities	-
1c. Number of schools or institutions that received assistance	Total	142,679

2. Training Teachers/Educators

2a. Number of teachers/educators who received training/professional development	Number of males	293,179
	Number of females	567,741
	Number trained in special education	45,278
	Crisis or conflict-affected	-
	Total (male and female)	966,700

3. Providing Safe and Equitable Learning Environments

3a. Number of educational facilities (school, classrooms, libraries, labs, latrines) built or repaired	Total	5,852
--	--------------	--------------

4. Engaging Families and Communities

4a. Number of parent-teacher associations (PTAs) or community-based school governance structures engaged in primary or secondary education supported with USG assistance	Total	11,483
4b. Number of family and community members who received training or services to support school attendance and student learning	Total	230

5. Providing Textbooks and Teaching and Learning Materials

5a. Number of textbooks and other teaching and learning provided	Total	30,626,699
--	--------------	-------------------

6. Systems Strengthening

6a. Number of new or reformed public-sector laws, policies, regulations, and/or administrative procedures that support increased access and/or learning adopted	Total	203
6b. Number of education administrators and officials who complete professional development activities	Number of males	55,450
	Number of females	50,220
	Total (male and female)	113,043

Notes:

Cells with a dash (-) represent cases where data is not available either because data was not collected in the particular country by USG agencies or departments or where data is collected by USG agencies and departments, but data was unreported in FY2023. It may also represent cases where the indicator value is zero.

Data may not represent final FY2023 reporting for agencies.

ANNEX THREE: INTERNATIONAL BASIC EDUCATION DISBURSEMENTS

FY 2023 U.S. Government Foreign Aid Disbursements for International Basic Education

The disbursement data presented in Annex Three are intended to describe efforts by departments and agencies to implement the U.S. Government Strategy on International Basic Education in FY 2023. Data comes from ForeignAssistance.gov, with the exception of the Department of State, which directly provided disbursement data. ForeignAssistance.gov defines a disbursement as “an outlay of funds, or cash or cash equivalent, placed at the disposal of a recipient government or organization.”

Data presented in ForeignAssistance.gov come from the financial systems of the submitting departments and agencies and other USG reports and publications, such as the President’s annual Budget Request and monthly Treasury statements. USAID helps standardize, validate, and code the data posted to ForeignAssistance.gov to meet the mandatory foreign aid reporting requirements—including the Green Book—and the U.S. Annual Assistance Report to the Development Assistance Committee of the Organization for Economic Co-operation and Development (OECD/DAC).

FY 2023 | U.S. GOVERNMENT FOREIGN AID DISBURSEMENTS FOR INTERNATIONAL BASIC EDUCATION

Notes:

† *Crisis and Conflict-Affected Countries*

For the purposes of aggregating data, USAID disbursements reported by the USAID Data Center were categorized from their purpose categories such that:

Vocational Training was categorized to *Upper Secondary Education*

Education Policy and Administration was categorized to *Education Level Unspecified*

Educational Research was categorized to *Education Level Unspecified*

Education Facilities and Training was categorized to *Education Level Unspecified*

**FY 2023 | U.S. GOVERNMENT FOREIGN AID DISBURSEMENTS FOR
INTERNATIONAL BASIC EDUCATION**

data as of February 2, 2024

DOS FY 2023 Total USG Foreign Aid Disbursements for International Basic Education		DOS FY 2023 International Basic Education Disbursements by Education Level (USD in current amounts)

MULTI-COUNTRY PROGRAMMING						
World	\$98,000,000	-	-	-	-	\$98,000,000

Data Source

Source: Data displayed in the country list table are based on Fiscal Year (FY) 2023 data of Foreign Aid disbursement amounts by agencies and departments. All financial data come from ForeignAssistance.gov. Data in this database come from the submitting agencies' financial systems and other U.S. Government reports and publications on an annual basis. All data go through a vetting and verification process before being posted to the website.

Dashes: Cells with a dash (-) represent cases where the FY 2023 disbursement value is zero. Values in parentheses represent negative disbursements.

Data Classification

Sector Classification: Data presented in Annex 2 follow the sectors used by ForeignAssistance.gov. The database categorizes data by distinct "aid" sectors that describe what a program does (e.g., basic education, secondary education, post-secondary education). The "sector" classification is based on the international standard maintained by the Organisation for Economic Co-operation and Development's Development Assistance Committee (OECD/DAC) <http://www.oecd.org/dac/stats/purposecodessectorclassification.htm>.

Sector Categories: Sector categories are aggregations of aid sectors into broader areas. Sector categories represent the broadest level of data classification areas presented by ForeignAssistance.gov (e.g., Agriculture, Commodity Assistance, Economic Growth, Education, Governance, Health and Population, Humanitarian, Infrastructure, and Other).

Purpose Codes: Within sector categories, data are also assigned a purpose code. Common purpose codes for education include primary education and basic life skills for youth. Data presented here are tagged with any education-related purpose code except higher education, which encompasses support to degree and diploma programs at universities, colleges, and polytechnics and includes the provision of scholarships. The code "level unspecified" includes educational facilities and training; education policy and administrative management; educational research; and teacher training. For the purposes of this report, it also includes funding for programming that reaches multiple education levels.

Definitions

Funding Agency: The agencies that award U.S. aid funds, with the exception of the Executive Office of the President (EOP). For foreign assistance appropriated through EOP, the obligating agency (USAID, State Department, Treasury Department, etc.) is reported as the funding agency.

Disbursements: Amounts paid by federal agencies, by cash or cash equivalent, during the fiscal year to liquidate government obligations. Negative disbursements appear for reconciliations and corrections.

Current Amount (USD): Current dollar amounts are unadjusted, actual values. All USD values presented in the table are current amount values.

Country Regions: Departments and agencies use different definitions to categorize countries into regions. Data are presented as received from ForeignAssistance.gov.

Crisis and Conflict-Affected Countries, across USG, are: Islamic Republic of Afghanistan, People's Republic of Bangladesh, Republic of Burkina Faso, Burma, Republic of Colombia, Democratic Republic of the Congo, Djibouti, Dominican Republic, Republic of El Salvador, Federal Democratic Republic of Ethiopia, Gaza/West Bank, Republic of Guatemala, Republic of Haiti, Republic of Honduras, Lebanese Republic, Republic of Liberia, Republic of Mali, Federal Democratic Republic of Nepal, Republic of Nicaragua, Republic of Niger, Republic of Nigeria, Islamic Republic of Pakistan, Republic of Senegal, Federal Republic of Somalia, Republic of South Sudan, Syrian Arab Republic, Republic of Uganda, Ukraine, Bolivarian Republic of Venezuela, Republic of Yemen.

Agency-Specific Notes

U.S. Department of Agriculture (USDA): In some countries where USDA works, McGovern-Dole projects reach some pre-primary schools in addition to primary schools. This funding cannot be disaggregated.

Department of Labor (DOL): Disbursements shown are for countries where the DOL supported education programming in FY 2023. As of this reporting, FY 2023 Q3 and Q4 disbursement data were not finalized due to DOL's transition to new financial systems. Due to internal policy, the DOL does not categorize its programs with the OECD-DAC "Education" sector classification. DOL programs provide formal and/or informal basic education and vocational/skills training to children engaged in or at risk of entering child labor. Currently the agency does not track disbursements by education sector. In some cases, disbursement data may include amounts related to non-education (broader policy) programs in addition to education programs.

Peace Corps: Education programs in Peace Corps refers to Volunteer engagement in either primary, secondary, or post-secondary education settings—this also comprises informal learning settings including language clubs, tutoring, etc. Currently the agency does not track disbursements by education sector at the post level.

U.S. Department of State: The disbursement figures for the Department of State for FY 2023's Bureau of Population, Refugees and Migration were made available as an estimate. Currently the agency does not track disbursements by education sector.
